

BUILT FOR MEDICAL-SUPPLY TEAMS

Keep the next step in view.

A connected workspace for referrals, patient records and follow-through.

Thoughtful software.
Real operational context.

Receive & review

Bring incoming documents and referral context into a process your team can review.

Keep context

Connect the patient workspace, conversations and order information.

Follow through

Organize notes and next actions around the work that needs attention.

Start with a focused pilot.

Define your priority workflow, locations, team roles, current systems and integrations. Agree on supported modules, migration, data handling, pricing and support before onboarding.

Additional capabilities to explore: product discovery, estimates and billing, calling, branded websites and marketing reporting.
